

AI READINESS CHECKLIST

FOR PROPERTY MANAGERS

INTRODUCTION

How prepared is your management company to automate, optimize, and scale with AI?

Property management is one of the most complex operational fields, balancing owners, tenants, maintenance, and finances.

AI can simplify that complexity by automating routine work, predicting issues, and improving tenant experience.

With the right systems, AI can help you:

- Cut admin time and response delays
- Predict maintenance before breakdowns occur
- Optimize marketing and tenant retention
- Empower staff to focus on people, not paperwork

“AI won’t replace property managers, but property managers who use AI will outperform those who don’t.”

AI READINESS CHECKLIST

How to Use This Checklist

1. Rate each item 1–5 (*1 = Not true, 5 = Absolutely true*)
2. Add up each section's total
3. See your overall AI Readiness Level on the final page

Data & Systems Infrastructure

1. We use modern property-management software or CRM to store all portfolio data.
2. Tenant, vendor, and maintenance data are accurate and up to date.
3. Our systems integrate with accounting, leasing, and marketing tools.
4. We track key KPIs like occupancy, turnaround time, and cost per unit.
5. Leadership can access dashboards or analytics easily.

Operations & Maintenance Automation

6. Work-order creation and routing are automated.
7. We track equipment performance or maintenance trends digitally.
8. We've explored predictive-maintenance or IoT sensor tools.
9. Scheduling and vendor coordination are mostly digital.
10. Our team measures cost and time savings from automation.

Tenant & Owner Experience

11. We use automated rent reminders and payment systems.
12. We respond to tenant inquiries via AI chatbot or smart portal.
13. We track and analyze tenant satisfaction data.
14. We use personalization in tenant or owner communications.
15. Owners receive real-time performance dashboards or reports.

AI READINESS CHECKLIST CONTINUED

Marketing & Leasing Optimization

16. Our listings are optimized or enhanced with AI copy tools.
17. We use AI or automation for ad placement and lead scoring.
18. We capture and track all leasing inquiries in one system.
19. Our team responds to leads within minutes using automation.
20. We measure conversion rates from inquiry to lease.

Team & Strategy Alignment

21. Leadership prioritizes innovation and process improvement.
22. We offer staff training on new technology tools.
23. We allocate an annual budget for technology upgrades.
24. We assess ROI for any tech implementation.
25. We have a clear AI roadmap for the next 12–24 months.

**Now, add up each section's subtotal to measure your agency's readiness in that domain.
Then, add all the subtotals to get your total readiness score.**

Total Score & Readiness Level

Level	Score	Meaning
Just Getting Started	0–40	You're still manual; begin with data cleanup and simple automation.
Foundation Ready	41–80	Systems are set up; time to pilot AI tools in leasing or maintenance.
Growth Mode	81–125	You're AI-ready; expand predictive maintenance and advanced analytics.

NEXT STEPS

Turn Insight into Action

You've completed the checklist!
Now turn your results into strategy.

Book a **free 30-minute AI Strategy Session** with Navigent AI Consulting.

We'll review your score, identify your top 3 AI use cases, and outline a roadmap for your company.

About Navigent AI Consulting

Navigent AI helps property-management companies integrate AI strategically, improving efficiency, tenant experience, and profitability.

"We don't just bring technology. We build clarity, efficiency, and peace of mind."
